YOUR GUIDE TO CHOOSING

A VACCINE ADMINISTRATION MANAGEMENT SYSTEM

BETTER NAVIGATING A SEA OF UNCERTAINTIES

2020 was a year unlike any we have ever experienced, as healthcare workers from across the world came together to care for those infected with COVID-19, and researchers and scientists worked rapidly to develop a safe and effective vaccine.

In 2021, there are now a number of vaccines, and more people continue to be vaccinated each day.

Still, the challenge of distributing the vaccines to everyone is just as daunting as it sounds. But if there's one thing we can learn from the past, it is that overcoming obstacles is seldom done singlehandedly.

Would the explorers whose deeds we marvel at — those who braved the unknown — have done so without a trusty compass, navigational charts, and a barrel of fresh limes?

Possibly, but it would have made the job a heck of a lot harder.

And so, the question remains: Could individual practices and clinics navigate the vaccination administration process?

Certainly, but having a reliable, secure, and affordable Vaccination Administration Management System (VAMS) to rely on could make the job a heck of a lot easier.

READ ON to find out 5 things that a quality **Vaccination Administration Management System** should do for you.

IT COULD SAVE TIME

Before setting sail, knowing who's coming along for the journey and keeping track of your supplies could make the job go a lot smoother.

In a world where every second matters and every action counts, a convenient and intuitive online appointment booking method is the way to go.

healow® Open Access®, our easy-to-use online appointment booking method, could help cut down on the time patients spend trying to set up a vaccination appointment that works with their schedule and gives you the opportunity to maximize the efficiency of your staff. You can even set up online appointment booking right on your practice's website!

When supply is limited and perishable, keeping track of the available inventory is critical. With our Vaccine Administration Management System, providers are able to **easily track and take note of every shot** that has been distributed to their patient population.
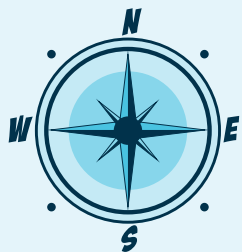

FIND OUT HOW David Uptagrafft, the Director of Operations at Innova Primary Care, utilized tools like healow Open Access to successfully navigate through the COVID-19 pandemic. **Watch here!**

IT HELPS PROMOTE SAFETY

A successful journey often depends on careful planning and a reliable set of tools.

eClinicalWorks healow Health and Online Wellness

Our HIPAA-compliant vaccine management solution was created with safety in mind and designed to reduce unnecessary exposure to sick patients in the waiting room.

healow CHECK-IN™, our contactless check-in solution, gives your patients an opportunity to review their demographics; confirm their insurance coverage; sign consent forms; fill out questionnaires; pay outstanding balances; and review medications, allergies, hospitalizations, and surgical histories – all from the comfort of their home.

When the patient arrives at the clinic, all they have to do is click a single button that notifies the staff that they have arrived at the office and where and how to find them.

Our vaccine management solution also allows providers to **send text message reminders** to patients, letting them know that their appointment is coming up so they don't miss a critical second dose of a vaccination.

FIND OUT HOW our contactless check-in solution is making care safer for patients and staff at Internist Associates, a four-provider primary care practice in Ridley Park, Pennsylvania. **Watch here!**

IT KEEPS THINGS ORGANIZED

With so many things in life scattered in countless directions, finding a way to bring order to chaos will prompt success.

Distributing a vaccine to a given population often comes with an expansive influx of data and a number of moving parts. Through our comprehensive and easy-to-use vaccine management solution, busy providers can **more easily complete documentation** relating to vaccine administration and **track the number of shots** given to a patient population.

Notifications sent out to patients can also be customized by age group and health status so that providers can create a balanced schedule and get the vaccinations out to people who need them most.
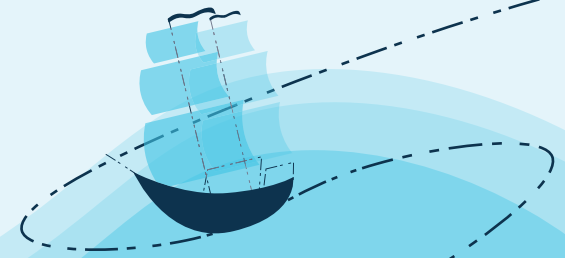

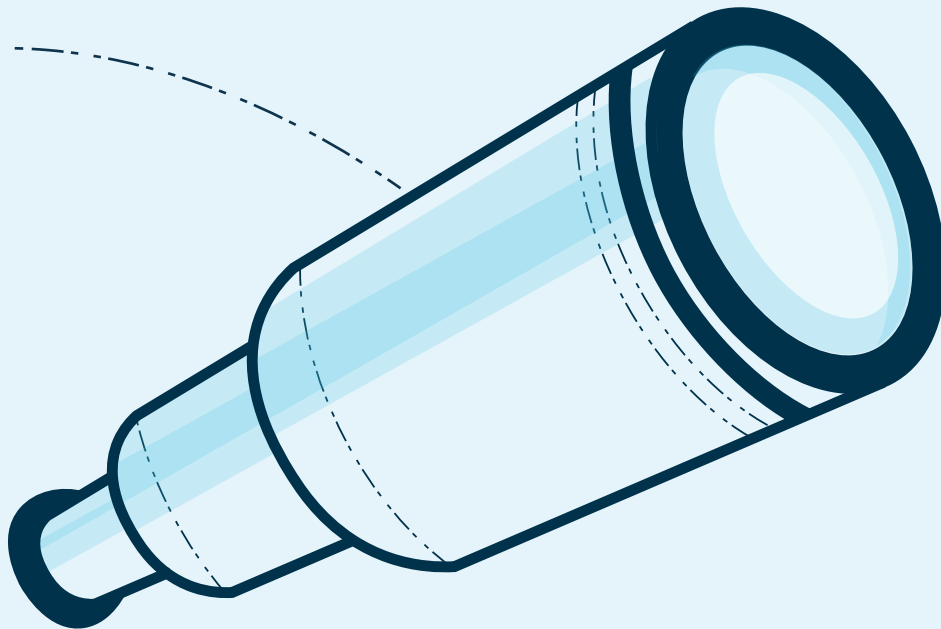

FIND OUT HOW eClinicalWorks customers are successfully utilizing tools like eClinicalMessenger® to send notifications to their patients and digitize their front office. **Watch here!**

IT GETS THINGS TO WHERE THEY NEED TO BE

Before reaching a destination, one should consider the simplest way to get there.

You're not the only one who finds this data useful. Public health officials need to track the overall success of vaccine initiatives to guide public policy and limit the spread of infectious diseases. Our vaccine management solution enables you to **transmit data to eClinicalWorks-supported state vaccine registries.**

And to ensure that you get reimbursed for your efforts, eClinicalWorks makes it simple to **submit claims related to vaccine clinics and campaigns to payers.**
